Dear Mr. Dole

We are going to as a list of question and we want you to answer
them personally.

1. (How much money does it cost to go to the moon.)
2. We think we should spend that money on more important things like: staring people.
Do you thing America should?)
3. (What are we accomplishing by going to the moon?) 4 Do you care for people or
moon rockets. When you write back make the letter make it easy for we are only nine
years old. We wrote this letter because we want to live in a better world.

In hope for a better world

Rick Rehorn
