Correspondence between Senator Dole and Chris Rone, student from Kansas City, KS, about the NASA space program.

20 April 1975

Dear Senator Dole,

My name is Chris Rone. I am a Boy Scout. I live in Kansas. I am 13 years old.

I would like to discuss the space program with you. What has happened to the big NASA space project? After we got on the moon, we went down hill in the space project. Is any more money being appropriated for future space programs? I believe that we have benefited from the space programs in the past. We now use many materials in our homes and industry that were invented because of the space program. We learned many new things about the earth. I hope in the future, if you get a chance to vote for continuing the space program, you will. I hope you will vote for money and new programs requested by NASA.

Someday I hope I will have a chance to work in the space program. I will be a taxpayer someday and will happily pay my share for the space program.

Sincerely,

Chris Rone
