Robert

Dear Sirs;

I'm half and half on the space programs because they say you can cure cancer. My grandma died of cancer so I hope you can cure it. I'm not for it in another way because you could spend money on those children that are starving so would you please help them and cure cancer so it is your choice.

Yours truly

Robert Johnson

Dear Congress

I agree for mens to steal go to the moon. Maybe womens mite get to go to the moon one of these year. Well we ~~we~~ don't need to go to the moon. The poor people need the money for some food and colthen. Battther them we need the money to go to the moon. The poor people need the money. So please give it to them.

Dear Congress,

I would like to have the space ship.

Thank you

Ricky Scott

Dear Sirs;

I wish you would keep up space travel. I want to become an astronaut someday and plan to work hard. I want to see in person the moon. It sounds like it would be really fun. I think that it would be fun to ride in the moon rover. The sight of the earth from the moon would really be great. The money could be spent better but I like this anyway. Do you think maybe one of these days they will sell tickets to the moon? I hope they do. I hope that people of the world or of the United States should be proud of our space program.

Your friend,

Dighton Grade School

Grade 6A

Dear Congressman,

I do not want to continue space travel because there are thousands of people starving and we could use the millions of dollars used for space travel for the people that are starving. All the astronauts do is bring dumb rocks back anyway.

Truly yours,  
Delinda Selfridge

Dear Sirs

I think we should go on but I think we should wait a little longer because we need  
the money for schools people factorys and for food until were settled enough.

Your friend,  
Mark Owen
