BALTIMORE, MARYLAND 21235

REFER TO: OI:P

May 19, 1966

Honorable Bob Dole
House of Representatives
Washington, D.C. 20515

RECEIVED

MAY 20 1966

BOB DOLE

Dear Mr. Dole:

As you know, May 31 is the last day for people who reached age 65 before March 1, 1966, to enroll in the Supplementary Medical Insurance Program established by the 1965 social security amendments and have their coverage under the program begin on July 1, 1966, when the new program starts. A person who reached age 65 before March 1 and who does not enroll by May 31 will generally not be able to enroll until the first general enrollment period, in October-December 1967, and will not be able to have coverage under the program until July 1, 1968.

Nationally, 90 percent of the aged have enrolled in the new medical insurance program and an additional five percent have elected not to enroll. There are about 1 million aged people--about five percent of the aged--from whom we have not received a decision on enrollment. We do not know whether these people do not wish to enroll in the program, are confused about it, or are simply unaware of it. The last two columns of the enclosed table show for each State the number of aged people who have not yet informed us of their enrollment decision.

In the interest of making every possible effort to assure that the people who are affected by the May 31 deadline are aware of it and of the loss of valuable medical insurance protection that will result if they do not enroll by that date, I am sending you some news releases that you may find helpful if you wish to give further publicity to the enrollment deadline.

Sincerely yours,

A handwritten signature in cursive script that reads "Robert M. Ball".

Robert M. Ball
Commissioner of Social Security

(Newsletter Item)

MEDICARE DEADLINE IS MAY 31st

Enrollment for medicare's voluntary medical insurance plan is nearing a new deadline, and the Social Security Administration reports that 90 percent of our older Americans have signed up for doctor-bill insurance under social security--a total, as of May 11th, of 17.2 million people. Beginning in July, these folks will pay \$3 a month and receive valuable protection against the costs of medical care for the rest of their lives. The \$3 monthly payment is half the cost of the insurance; the government pays the other half.

In (State), about _____ people 65 or over, _____ percent of those eligible, have signed up.

I think this is a pretty good showing. However, there are some people in _____ who haven't yet made a decision on medicare.

With the final medicare sign-up deadline fast approaching, I hope every one of my constituents will do his or her best to make sure older people know about medicare and about the need to sign up if they want the voluntary medical insurance.

The deadline is May 31st, the day after Memorial Day--the _____ folks in _____ who are 65 or older and who haven't yet told Social Security about their decision on medicare should do so before that date. If they don't, they will generally have to wait more than 2 years before their protection against the costs of medical care can begin.

DRAFT LOCAL RELEASE

For people now 65 or over, the final deadline for enrollment in medicare's voluntary doctor-bill insurance plan is May 31st, _____ today reminded the people of (State).

"The Social Security Administration has reported to me," he said, "that 17.2 million older people, or 90 percent of those 65 or over in the United States, have signed up for the voluntary medical insurance to supplement their basic hospital insurance under medicare." About 400,000 have enrolled since the extension of the original deadline of March 31st.

"Beginning on July 1st, these people will pay \$3 a month and will receive valuable help in paying the costs of medical care. This is half the cost of the insurance; the government pays the other half."

"In (State), _____ people have signed up -- _____ percent of the people 65 or over. But _____ have not yet told Social Security whether or not they want to sign up."

_____ encouraged relatives and friends of older people to check to make sure they have heard about medicare and about the need to sign up if they want the voluntary medical insurance.

"The social security office is the place to sign up," he said, "and now is the time to do it."

1 - minute radio or television announcement:

I am _____.

I want to ask your help in getting an important message about medicare to people 65 or over who may not have heard it. The message is this: now you have until May 31 to enroll for the voluntary part of medicare, which will help to pay your doctor bills beginning in July. The Government will pay half the cost of this insurance for you, and this will make your share only \$3 a month. Ninety percent of all Americans 65 or older have already enrolled. Only a few have said that they do not want this insurance, and many of these have now changed their minds. Even if you first said you did not want medical insurance, you may still change your mind and take it if you apply by May 31. If anyone you know is 65 or older and wants to enroll for medical insurance under medicare, please ask him to get in touch with the social security office right away.
